PROFESSIONAL SUMMARY

Background in customer support and commissioned software development, with experience handling customer inquiries, managing orders, and developing web and mobile applications. Interested in AI-assisted development and cloud computing, with project experience in business management systems and IoT-integrated solutions. Combines technical problem-solving with an understanding of user needs and business processes.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL
Frameworks & Runtime: Angular, React, Laravel, Node.js
Database: MySQL, SQLite
Web & APIs: HTML, CSS, REST APIs
Tools & Cloud: AWS, Alibaba Cloud, Cloudflare, Git
AI & Development: AI-Assisted Development, Agentic Coding

EDUCATION

NATIONAL UNIVERSITY – FAIRVIEW **Quezon City**
BS Information Technology with Specialization in Mobile and Internet Technologies **2022 – Present**
Dean's Lister 2024
Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Web & Mobile Development, Cloud Computing

OUR LADY OF FATIMA UNIVERSITY **Quezon City**
Science, Technology, Engineering, and Mathematics (STEM) **2019 – 2022**

WORK EXPERIENCE

ONLINE STORE / SMALL BUSINESS OPERATIONS **Remote**
Online Order & Customer Support **May – July 2025**

- Managed customer inquiries through live chat and social messaging platforms, providing product information, order updates, and delivery tracking.
- Handled order changes, cancellations, and customer concerns through clear communication and issue resolution.

PROJECTS

Information Management System with IoT- Assisted Document Request Services Using Kiosk for Barangay San Manuel
Capstone Project | Developer

- Developed a web-based Barangay Information Management System integrated with an IoT-powered self-service kiosk for document requests.
- Implemented RFID-based resident authentication, online document request processing, queuing system, verification, and an administrative dashboard using Angular, Node.js, MySQL, and RESTful APIs.

A Web-based Tailoring Ordering System for JDE Work of Our Hands
Capstone Project | Developer

- Developed a web-based ordering and customer management system for a tailoring business.
- Implemented online order tracking, customer information management, and order status monitoring to improve business operations.

CashTrack: Expenses Tracker
Commissioned Project | Mobile Application Developer
- Developed a personal finance mobile application for a client to manage income, expenses, and savings efficiently.
- Implemented expense categorization, transaction history, and budget monitoring using SQLite with an intuitive and user-friendly interface.

DIY Seismic Monitor: Building an Earthquake Detector for Establishments
Academic Project | Embedded Systems Project Manager
- Developed an embedded system capable of detecting seismic activity and providing real-time earthquake alerts.
- Integrated sensors with a microcontroller to enhance emergency preparedness and safety within establishments.

Here Pawr You: Adoption and Lost & Found System for Stray Animal
Academic Project | Developer
- Developed a web-based system that streamlines pet adoption and lost-and-found reporting for stray animals.
- Designed and implemented the database and CRUD functionalities for managing pets, adopters, and adoption records.

CERTIFICATIONS & ACTIVITIES

Certifications: Alibaba Cloud Certified Big Data Associate (2025)
Alibaba Cloud ECS, SLB, Auto Scaling, OSS, and ApsaraDB RDS Fundamentals (2025)
IoT Foundations: Operating Systems Fundamentals (2025).
Activities: Codability Tech Student Organization (CTSO) — Member; participated in IT workshops, seminars, technical events, and technology initiatives.
Activities: Vibe Code and Agentic Coding — Seminar Participant; Explored AI-assisted software development, modern coding workflows, and agentic programming concepts.
